

BUILT FOR BORDERLESS PAYMENTS

Invoice now. Digital-Asset Payment Made Easy

Create invoices, pay or get paid in supported digital currencies, and track every payment from one place.

For businesses and individuals using or exploring digital currency payments.

The same payment problems kept coming up.

Across the conversations, three kinds of friction kept showing up.

01

Using crypto

"Which wallet should I use?"
"Which network do I select?"
"What if I send it to the wrong address?"

02

Understanding crypto

"Why do I need another token for gas?"
"How do I know the payment reached them?"
"Why does paying feel this complicated?"

03

Running it as a business

"Who completed the KYC?"
"How does finance verify the payment?"
"How do we reconcile and use the funds?"

THE PATTERN

Stablecoin payments work. The experience around them is still too complicated.

Before anyone gets paid, someone has to figure all of this out.

The invoice is only one step. The real problem is everything required to complete and account for the payment.

01

KYC

Verify the people and business.

02

Wallet setup

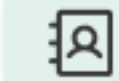

Connect or create a payment wallet.

03

Currency + chain

Choose the asset and network.

04

Address check

Confirm every destination detail.

05

Gas

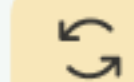

Fund the fee before you can pay.

06

Confirmation

Track when the payment lands.

07

Reconciliation

Match payment to invoice and records.

08

Settlement

Hold, spend, or move the funds.

InvoiceNow is your one-stop shop for all your payment needs

From onboarding and approvals to payment, reconciliation, analytics and settlement, all in one operational flow.

01

End-to-end solution

Invoicing, maker-checker approvals, payments, reconciliation and analytics.

02

Multi-currency support

Work with supported currencies and chains, with more added regularly.

03

Settlement options

Disburse funds or cash out through the Winity Visa card. Fiat bank settlement is coming soon.

NEW FEATURES COMING SOON

04

Bring Your own Chain (BYoC)

Connect the chain that works for your business.

05

Gasless transactions

Make payments without sourcing and managing gas tokens.

06

Business integrations

Connect ERP, accounting and payment-gateway workflows.

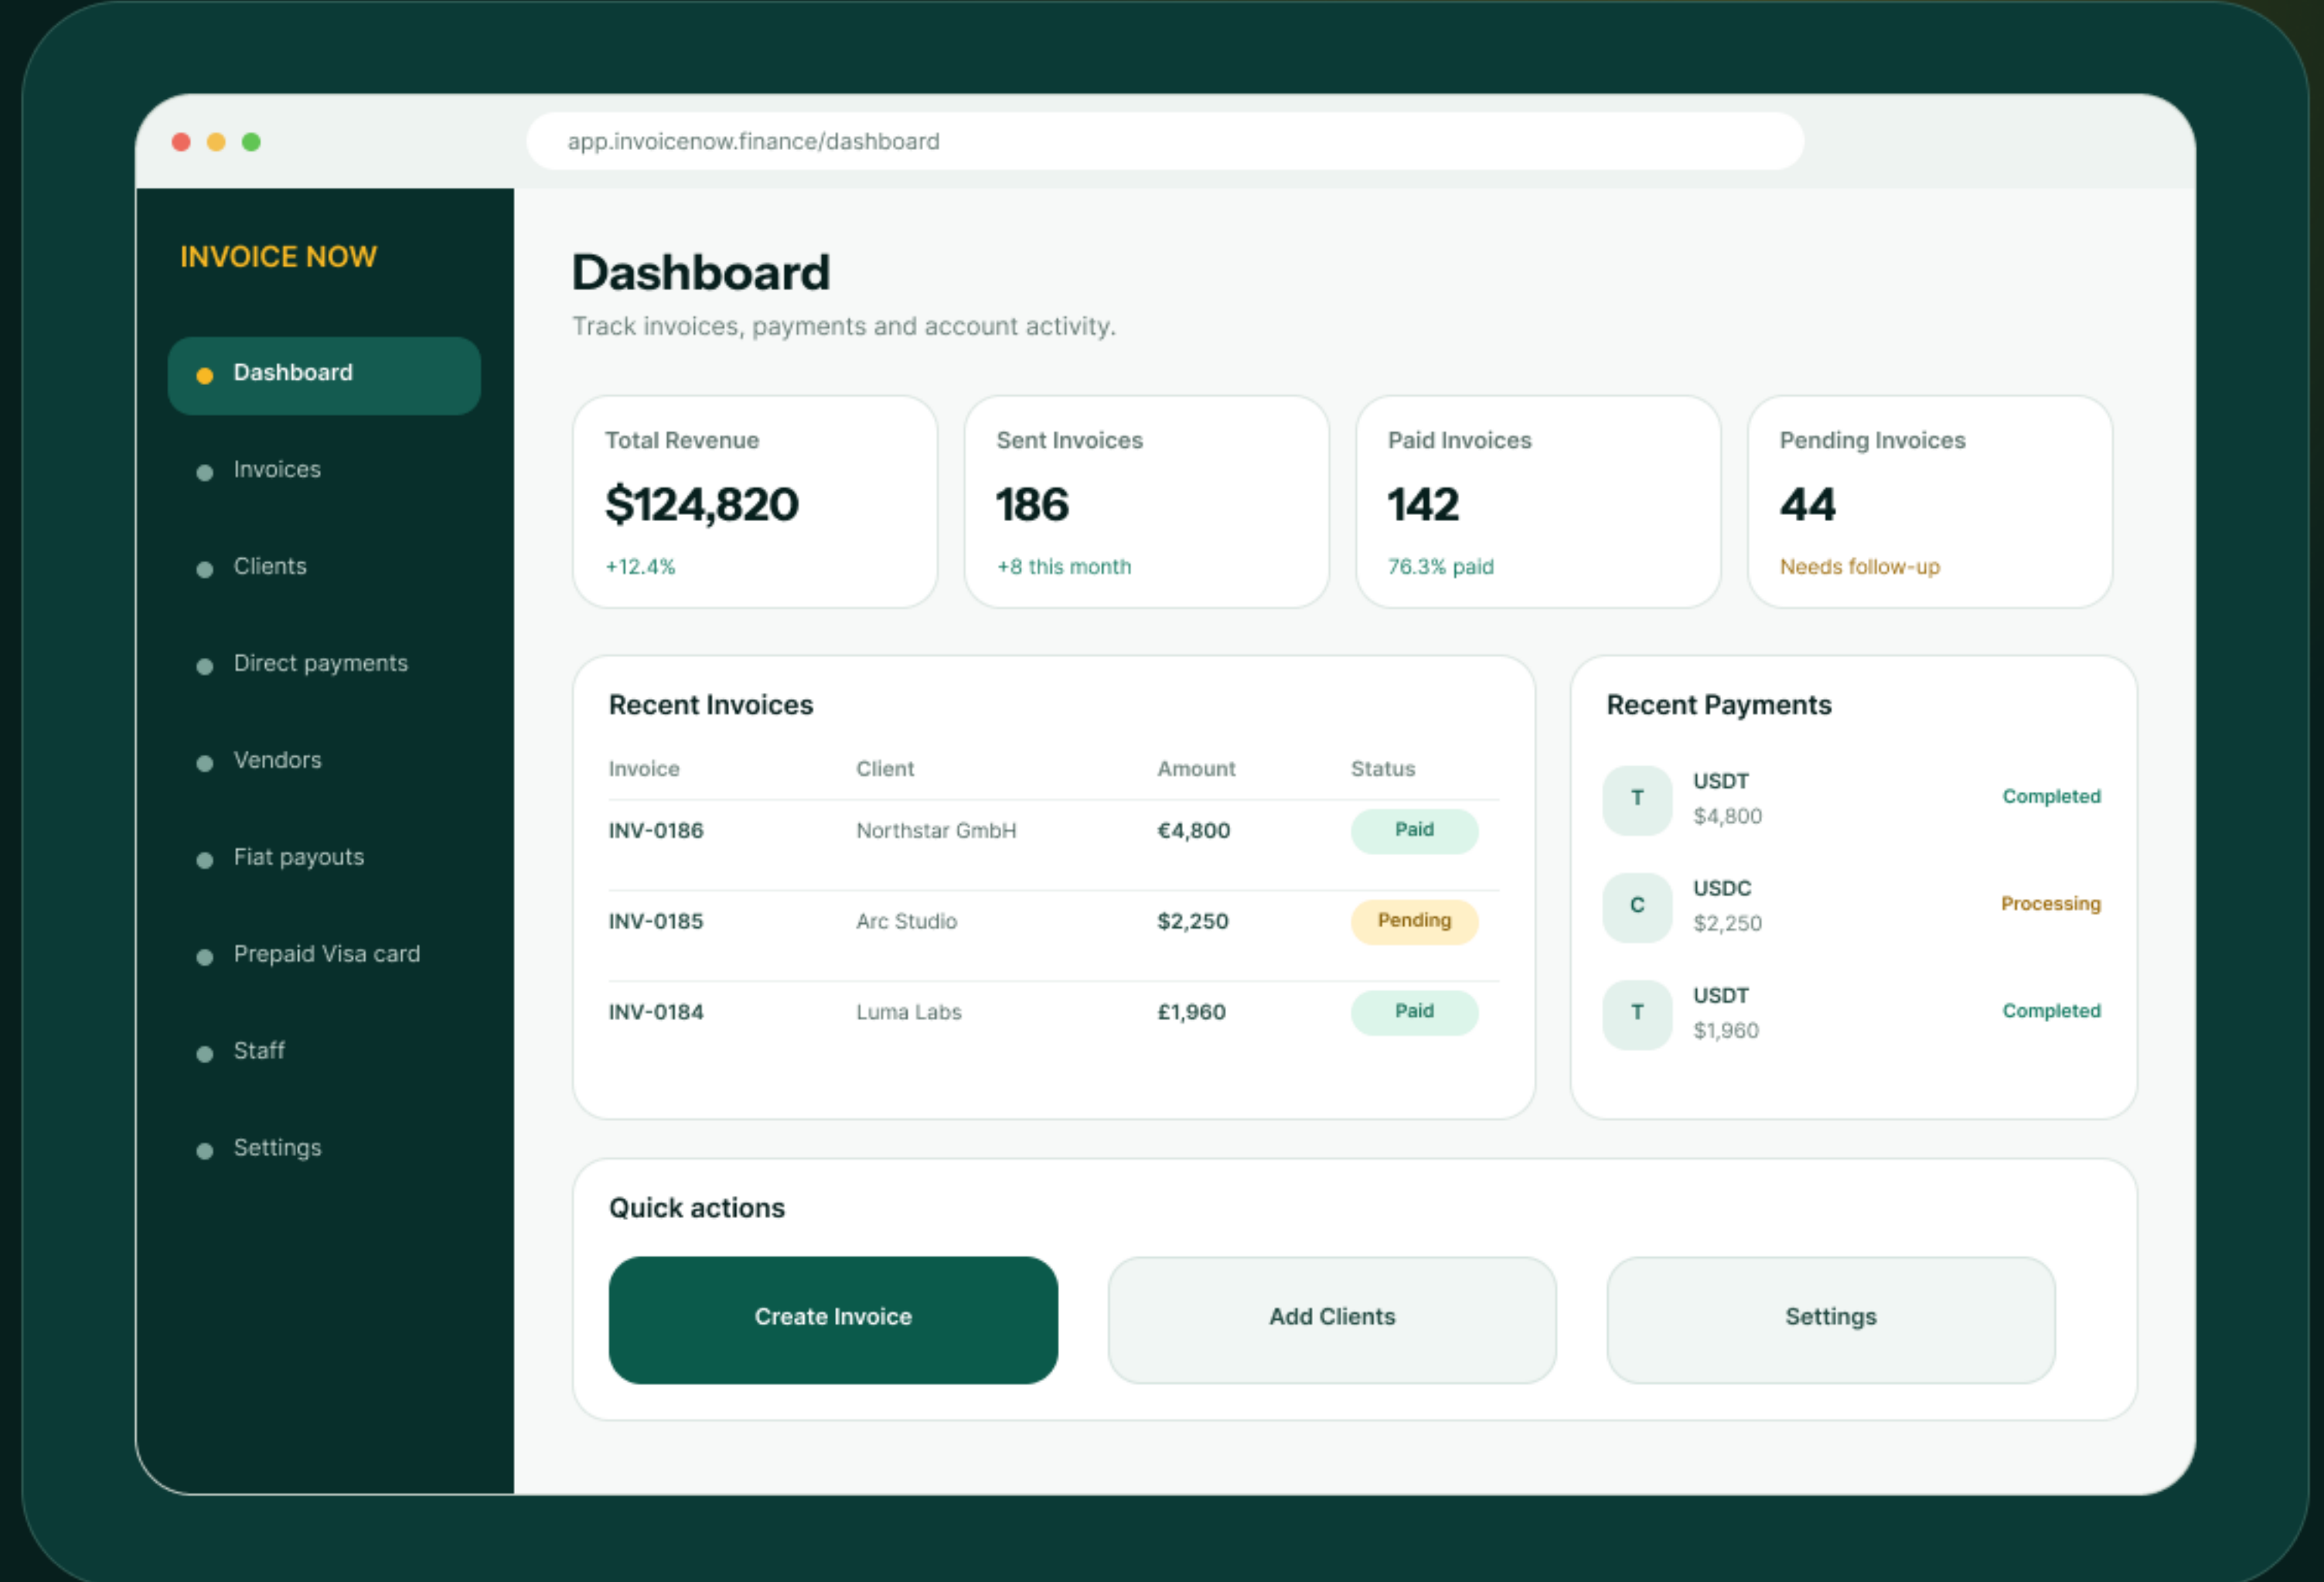

One unified dashboard for your payment operations.

Manage balances, approvals, invoices, payments, reconciliation and settlement from one place.

01 Balances and supported currencies

02 Approvals, payments and status

03 Reconciliation and cash-out

Make your next payment a no-brainer.

Invoice, pay, reconcile and cash out without stitching together wallets, spreadsheets and messages.
